- (5) The Insurer shall not be liable for more than the actual cash value of the automobile at the time any loss or damage occurs, and the loss or damage shall be ascertained or estimated according to that actual cash value with proper deduction for depreciation, however caused, and shall not exceed the amount that it would cost to repair or replace the automobile, or any part thereof, with material of like kind and quality, but, if any part of the automobile is obsolete and out of stock, the liability of the Insurer in respect thereof shall be limited to the value of that part at the time of loss or damage, not exceeding the maker's latest list price.

Repair or Replacement

- (6) Except where an appraisal has been made, the Insurer, instead of making payment, may, within a reasonable time, repair, rebuild or replace the property damaged or lost with other of like kind and quality if, within seven days after the receipt of the proof of loss, it gives written notice of its intention to do so.

In Case of Disagreement

- (8) In the event of disagreement as to the nature and extent of the repairs and replacements required, or as to their adequacy, if effected, or as to the amount payable in respect of any loss or damage, those questions shall be determined by appraisal as provided under *The Insurance Act* before there can be recovery under this contract, whether the right to recover on the contract is disputed or not, and independently of all other questions. When Action May be Brought

- (2) The insured shall not bring an action to recover the amount of a claim under this contract unless the requirements of statutory conditions 3 and 4 are complied with or until the amount of the loss has been ascertained as therein provided or by a judgment against the insured after trial of the issue or by agreement between the parties with the written consent of the Insurer.

Limitation of Actions

- (3) Every action or proceeding against the Insurer under this contract in respect of loss or damage to the automobile shall be commenced within one year next after the happening of the loss and not afterwards, and in respect of loss or damage to persons or property shall be commenced within one year next after the cause of action arose and not afterwards.

Who May Give Notice and Proofs of Claim

7. Notice of claim may be given and proofs of claim may be made by the agent of the insured named in this contract in case of absence or inability of the insured to give the notice or make the proof, such absence or inability being satisfactorily accounted for or, in the like case or if the insured refuses to do so, by a person to whom any part of the insurance money is payable.

- (3) Where this contract is terminated by the insured, the Insurer shall refund as soon as practicable the excess of premium actually paid by the insured over the short rate premium for the expired time, but in no event shall the short rate premium for the expired time be deemed to be less than any minimum retained premium specified.
- (4) The refund may be made by money, postal or express company money order or cheque payable at par.

1971 for the municipality in which the predecessor-board area is located,

upon the assessment for 1972 in the predecessor-board area.

(2) Where a municipality or a predecessor-board area did not have a post-subsidy break-even mill rate for 1969, or where the post-subsidy break-even mill rate for 1969 for a municipality or a predecessor-board area was less than the quotient obtained by dividing 100 by the assessment equalization factor for 1971 for the municipality, such quotient shall be used in clause *b* of subsection 1 in lieu of the post-subsidy break-even mill rate for 1969 for the municipality or for the predecessor-board area, as the case may be.

(3) Notwithstanding subsection 2, in determining under subsection 1 the subsidy for a predecessor-board area for separate-school purposes in which, in 1968, property was rateable for public school purposes but not for separate-school purposes, the post-subsidy break-even mill rate for 1969 for public-school purposes shall be used in clause *b* of subsection 1 in lieu of the post-subsidy break-even mill rate for 1969 for separate-school purposes.

(4) Notwithstanding subsection 2, in determining under subsection 1 the subsidy for a predecessor-board area for public-school purposes in which, in 1968, property was rateable for separate-school purposes but not for public-school purposes, the post-subsidy break-even mill rate for 1969 for separate-school purposes shall be used in clause *b* of subsection 1 in lieu of the post-subsidy break-even mill rate for 1969 for public-school purposes. O. Reg. 98/72, s. 20.

21. The grant payable under this Part shall be applied by the board to reduce the levy from the predecessor-board area on whose behalf it is payable. O. Reg. 98/72, s. 21.

PART 7

ASSISTANCE IN RESPECT OF ADJUSTED DEFICITS

22.—(1) A divisional board of education or a county or district combined separate-school board

shall be paid in 1972 a sum equal to 33½ per cent of the adjusted deficits, as at the 31st day of December, 1968, of the predecessor boards, excluding from such adjusted deficits adjustments to achieve uniformity in accounting for instructional salaries, and such sum shall be applied by the board to reduce the adjusted deficits chargeable to the municipalities or parts comprising the jurisdictions of the predecessor boards.

(2) In addition to the sum payable under subsection 1, a divisional board of education or a county or district combined separate-school board shall be paid in 1972 on behalf of each predecessor board whose financial statements for 1968 did not include 40 per cent of the instructional salaries for the school year 1968-69, a sum equal to the excess of 40 per cent of the instructional salaries for the school-year 1968-69 over the amount that was included in the financial statements of the board for 1968 in respect of the salaries of such teachers for the school-year 1968-1969 but such sum shall be reduced by the portion of the grant and subsidy received by the board in 1969, 1970 and 1971, by reason of including in the financial statements for 1969, 1970 and 1971 more than 100 per cent of the cost to the board of the services of such teachers, including temporary teachers, as the Minister may determine for the year or years, as the case may be.

(3) For the purposes of this Part,

(a) the amounts of the adjusted deficits referred to in subsection 1 and any alterations thereto shall be as determined by the Minister; and

(b) predecessor board means a board that was dissolved on the 31st day of December, 1968, and whose area became part of the jurisdiction of the divisional board of education or of the county or district combined separate-school board. O. Reg. 98/72, s. 22.

**THE SECONDARY SCHOOLS AND BOARDS
OF EDUCATION ACT**

O. Reg. 99/72.
Apportionment 1972 Requisitions.
Made—March 1st, 1972.
Filed—March 1st, 1972.

**REGULATION MADE UNDER
THE SECONDARY SCHOOLS AND BOARDS
OF EDUCATION ACT**

APPORTIONMENT 1972 REQUISITIONS

1. In this Regulation,

(a) "adjusted deficit" means the deficit for public school purposes or for secondary school purposes, as the case may be, of a board that was dissolved on the 31st day of December, 1968, adjusted to include reserve

fund balances and reserves for working funds and further adjusted by relevant financial data included in the report of the arbitrators appointed under section 30 of the Act, but does not include any adjustment in respect of a capital asset that was made by arbitrators so appointed;

(b) "assessment" for a year means the sum of,

(i) the residential and farm assessment as defined in clause b of section 74 of *The Schools Administration Act*, and

(ii) the quotient obtained by dividing the commercial assessment as defined in clause a of section 74 of *The Schools Administration Act*, by 0.9,

that is rateable for public school purposes or for secondary school purposes, as the case may be, except that reference to the last revised assessment roll in clauses a and b of the said section 74 shall, for the purposes of this Regulation, be deemed to be reference to the assessment roll on which taxes are levied in the year;

(c) "assessment equalization factor for 1971" means, for a municipality or a locality, the equalization factor in column 2 set opposite the name of the municipality or locality in column 1 of Schedule B to Ontario Regulation 98/72;

(d) "equalized assessment for a municipality or locality" means the sum, in respect of the municipality or locality, of,

(i) the assessment for 1971, and

(ii) the equivalent assessment,

adjusted by the assessment equalization factor for 1971 for the municipality or locality;

(e) "equivalent assessment" means, in respect of a municipality or locality, the amount that, if levied upon at the rate that is the sum of,

(i) the post-subsidy break-even mill rate for 1969 for public school purposes or for secondary school purposes, as the case may be, adjusted by the Department where the general level of assessment in the municipality or locality has been raised subsequent to 1969, and

(ii) the quotient obtained by dividing 100 by the assessment equalization factor for 1971,

in respect of the municipality or locality, would yield a sum equal to the payment in lieu of taxes for 1971 for public school purposes or for secondary school purposes, as the case may be, for the municipality or locality;

(f) "interest on adjusted deficit" means 7 per cent of 66 $\frac{2}{3}$ per cent of the adjusted deficit as at the 31st day of December, 1968;

(g) "locality" means a part of territory without municipal organization within a school division to which an assessment equalization factor for 1971 has been assigned in Schedule B to Ontario Regulation 98/72;

(h) "municipality" means,

(i) a city, town, village or township, including any part of territory without municipal organization that is deemed to be attached thereto for public and secondary school purposes under subsection 7 of section 27 of the Act, and

(ii) where a township is in two school divisions, the portion of the township that is in a school division;

(i) "payment in lieu of taxes" for a year means, in respect of a municipality or locality, the excess of that portion of the sum required by the divisional board for the year for public school purposes or for secondary school purposes, as the case may be, that is apportioned to the municipality or locality, over the sum that, exclusive of adjustments in respect of any previous year, is required to be raised by taxation for such purposes in the municipality or locality;

(j) "post-subsidy break-even mill rate" for a year for public school purposes or for secondary school purposes, as the case may be, means, in respect of a municipality or locality, the mill rate that, if applied to the assessment for such year that is rateable for such purposes in the municipality or locality, would have provided the pre-subsidy break-even requirement for the municipality or locality in such year, less the sum of,

(i) the payment in lieu of taxes, and

(ii) the subsidy,

for such year in respect of the municipality or locality;

(k) "predecessor-board area" means for public school purposes or for secondary school purposes,

(i) a municipality or locality, or

(ii) a part of a municipality or of a locality,

that, in the year 1968, was within the area of jurisdiction of one public school board or one secondary school board, as the case may be, or that, in such year, was not within the area of jurisdiction of a public school board or a secondary school board, as the case may be;

(l) "pre-subsidy break-even requirement for a municipality or locality" means the portion of the pre-subsidy break-even requirement of a board for public school purposes or for secondary school purposes, as the case may be, that is apportioned to the municipality or locality;

(m) "pre-subsidy break-even requirement of a board" means the sum of the amounts that, if there were no subsidy payable on behalf of any predecessor-board area within the school division, would have been requisitioned for public school purposes or for secondary school purposes from the municipalities and localities in the school division to provide as at the end of the year neither an increase nor a decrease in the surplus, deficit or reserves for public school purposes or for secondary school purposes, as the case may be, accumulated by the divisional board as at the beginning of the year;

(n) "subsidy" for a year means the education mill rate subsidy payable to a divisional board on behalf of a predecessor-board area for public school purposes or for secondary school purposes, as the case may be, for the year, and for 1969 includes for secondary school purposes the grant payable for 1969 for the purpose of reducing by 67 per cent the requisition for secondary school purposes from a predecessor-board area that immediately prior to the 1st day of January, 1969 was not in a secondary school district;

(o) "sum required by a divisional board for public school purposes for the year 1972" means the pre-subsidy break-even requirement of the divisional board for public school purposes for 1972, less the interest on adjusted deficits that is chargeable in 1972 to the predecessor-board areas in the school division in respect of public schools;

(p) "sum required by a divisional board for secondary school purposes for the year

1972" means the presubsidy break-even requirement of the divisional board for secondary school purposes for 1972, less the interest on adjusted deficits that is chargeable in 1972 to the predecessor-board areas in the school division in respect of secondary schools. O. Reg. 99/72, s. 1.

2.—(1) Subject to subsection 2, the sum required by a divisional board for public school purposes for the year 1972 shall be apportioned among the municipalities and localities in the school division in the ratio, correct to five places of decimals, of the equalized assessments for such municipalities and localities for public school purposes.

(2) Where interest on adjusted deficit for public school purposes is chargeable to one or more predecessor-board areas for public school purposes that are parts of a municipality or of a locality, the amount apportioned to the municipality or locality under subsection 1 shall be further apportioned among such predecessor-board areas in the ratio, correct to five places of decimals, of the assessments for 1972 for public school purposes of the parts of the municipality or of the locality among which the amount is to be apportioned. O. Reg. 99/72, s. 2.

3.—(1) Subject to subsection 2, the sum required by a divisional board for secondary school purposes for the year 1972 shall be apportioned among the municipalities and localities in the school division in the ratio, correct to five places of decimals, of the equalized assessments for such municipalities and localities for secondary school purposes.

(2) Where interest on adjusted deficit for secondary school purposes is chargeable to one or more predecessor-board areas for secondary school purposes that are parts of a municipality or of a locality, the amount apportioned to the municipality or locality under subsection 1 shall be further apportioned among such predecessor-board areas in the ratio, correct to five places of decimals, of the assessments for 1972 for secondary school purposes of the parts of the municipality or of the locality among which the amount is to be apportioned. O. Reg. 99/72, s. 3.

4. The interest on adjusted deficit for public school purposes or for secondary school purposes, that is chargeable to a predecessor-board area, shall be added to the amount apportioned to the predecessor-board area under section 2 for public school purposes or under section 3 for secondary school purposes, as the case may be. O. Reg. 99/72, s. 4.

5. This Regulation applies in respect of the apportionment of the sum required by a divisional board for public school purposes, and the sum required by a divisional board for secondary school purposes, for the year 1972. O. Reg. 99/72, s. 5.

- (iii) a statement of the changes, if any, in the financial structure and control of the applicant.

(2) Notice shall be given to the Director of any change in the name of a person, partnership or company registered as a dealer, adviser or underwriter at least ten days prior to the effective date of such change and such notice shall be by way of application for amendment of registration prepared in accordance with Form 3 accompanied by such documents relating to the change of name as the Director may require.

3. Subsection 1 of section 11 of Regulation 794 of Revised Regulations of Ontario, 1970 is revoked and the following substituted therefor:

REPORTING BY EXEMPT PURCHASER AND PRIVATE PLACEE

11.—(1) Where a trade has been made in the course of a distribution to the public to a purchaser who is a person or company referred to in paragraph 3 or 9b of subsection 1 of section 19 of the Act or subsection 3 of section 19 of the Act, the vendor or his agent, if any, shall within ten days after the sale of the security resulting from such trade, file with the Commission a report prepared and executed in accordance with Form 11.

4. Section 27 of Regulation 794 of Revised Regulations of Ontario, 1970, as remade by section 1 of Ontario Regulation 182/71, is revoked and the following substituted therefor:

27.—(1) For the purpose of the reports required under section 26 or in any references to the property of the company contained in either Form 16 or Form 17, where the report relates to, or reference is made to, the property of a mining company or a mining exploration company,

- (a) "ore" means a natural aggregate of one or more minerals which, at a specified time and place, may be mined and sold at a profit or from which some part may be profitably separated;
- (b) "proven ore" or "measured ore" means that material for which tonnage is computed from dimensions revealed in outcrops or trenches or underground workings or drill holes and for which the grade is computed from the results of adequate sampling and for which the sites for inspection, sampling and measurement are so spaced and the geological character so well defined that the size, shape and mineral content are established and for which the computed tonnage and grade are judged to be accurate within limits which shall be stated and for which it shall be stated whether the tonnage and grade of proven ore or measured ore are *in situ* or extractable, with dilution factors shown and reasons for the use of these dilution factors clearly explained;
- (c) "probable ore" or "indicated ore" means that material for which tonnage and grade are computed partly from specific measure-

ments, samples or production data and partly from projection for a reasonable distance on geologic evidence and for which the sites available for inspection, measurement and sampling are too widely or otherwise inappropriately spaced to outline the material completely or to establish its grade throughout;

- (d) "possible ore" or "inferred ore" means that material for which quantitative estimates are based largely on broad knowledge of the geologic character of the deposit and for which there are few, if any, samples or measurements and for which the estimates are based on an assumed continuity or repetition for which there are reasonable geological indications, which indications may include comparison with deposits of similar type and bodies that are completely concealed may be included if there is specific evidence of their presence;
- (e) estimates of possible ore or inferred ore shall include a statement of conditions within which the inferred material occurs; and
- (f) the arithmetical average of any amount of sampling is not necessarily representative, unless the distribution of values and number of samples are properly taken into account and a statement of how samples were taken shall be given and where mineralization is erratic, the method of treating erratic values, shall be given in the narrative of the report.

(2) For the purpose of the reports required under section 26 or in any reference to the property of the company contained in Form 16 where the report relates to, or reference is made to, the property of an oil or gas company,

- (a) "crude oil" is a mixture that consists mainly of pentanes and heavier hydrocarbons, which may contain sulphur compounds and that is recoverable at a well from an underground reservoir and that is liquid at the conditions under which its volume is measured or estimated and includes all other liquid hydrocarbons so recoverable except natural gas liquids;
- (b) "natural gas" is a mixture, consisting principally of hydrocarbons that may contain non-hydrocarbon gases such as carbon dioxide, hydrogen sulphide or nitrogen, which mixture is recoverable from an underground reservoir and is in the gaseous phase or in solution with crude oil in the reservoir;
- (c) "natural gas liquids" are the hydrocarbon components propane, butanes, and pentanes plus, or a combination of them, which

hydrocarbon components are subject to recovery from raw gas as liquids by the processes of condensation or absorption, which recovery takes place in field separators, scrubbers, gas processing and reprocessing plants or cycling plants;

- (d) "commercial production" is output from a well of such quantity of petroleum substances as, having regard to the cost of drilling and production and the price, kind and quality of such production, would justify from a commercial and economic point of view the drilling of a similar well in the immediate surroundings;
- (e) "proved reserves underlying a property" are the estimated economically recoverable quantities of crude oil, natural gas and natural gas liquids, including the reserves to be obtained by enhanced recovery processes demonstrated to be successful, from that portion of an area delineated by gas-oil or oil-water or gas-water contacts in drilled wells or which can be reasonably evaluated as economically productive, on the basis of drilling, geological, geophysical and engineering data, but reserves in un-drilled prospects cannot be classed as proved reserves;
- (f) "proved developed reserves" are those proved reserves which will be produced from existing wells or facilities;
- (g) "proved undeveloped reserves" are those proved reserves which are not recoverable from existing wells or facilities or from those zones in existing wells which have been cased-off, but which can be recovered through the drilling of additional wells;
- (h) "probable reserves" of crude oil, natural gas and natural gas liquids include proved reserves plus an estimate of any additional reserves which may be recovered from the known pool or from that portion underlying the properties. The estimates of probable reserves are as realistic as can be determined on the basis of the information available. The area considered probable shall be the estimated ultimate size of the reservoir or of that portion underlying the properties including the proved area and shall be based on a realistic interpretation of the geological or geophysical, or geological and geophysical data available at the time the estimate is made, probable reserves to be obtained by the application of enhanced recovery processes include proved reserves, reserves from the additional probable area and increased recovery over and above that recognized in the proved category which can be realistically estimated to be ultimately economically recovered from the pool or such portions as underly the properties.

5. Section 27a of Regulation 794 of Revised Regulations of Ontario, 1970, as made by Ontario Regulation 182/71, is revoked and the following substituted therefor:

THIS AGREEMENT made in triplicate this.....day

of....., A.D. 19...

BETWEEN:

(hereinafter jointly and severally called the "Vendors" of the First Part) and

(hereinafter called the "Trustee" of the Second Part) and

(hereinafter called the "Company" of the Third Part)

WHEREAS the Vendors or predecessors in title of one or more of them and the Company entered into an agreement dated the.....day of.....,

A.D. 19... whereby the Vendors or such predecessors agreed to sell certain property to the Company, the consideration for such property being at least in part the allotment of treasury shares or the transfer of shares of the Company to the Vendors or such predecessors, the property and the number of shares and the names of the Vendors presently owning or to receive such shares, being respectively and more particularly described in Schedule "A" attached to and forming part of this agreement.

AND WHEREAS in furtherance of complying with the requirements of *The Securities Act*, the Vendors are desirous of depositing in escrow certain shares in the Company owned or to be received by them.

AND WHEREAS the Trustee has agreed to undertake and perform its duties according to the terms and conditions hereof.

NOW THEREFOR this agreement witnesseth that in consideration of the aforesaid agreements and of the sum of one dollar (\$1.00) now paid by the parties hereto, each to the other (receipt of which sum the parties do hereby respectively acknowledge each to the other), the Vendors jointly and severally covenant and agree with the Company and with the Trustee and the Company and the Trustee covenant and agree each with the other and with the Vendors jointly and severally as follows:

- (1) Each of the Vendors hereby places and deposits in escrow those of his shares of the Company which are represented by the share certificates described or referred to in Schedule "A" hereto, with the Trustee and hereby undertakes and agrees forthwith to deliver those certificates (including any replacement certificates if and when such are issued or allotted) to the Trustee for deposit in escrow.
- (2) The parties hereby agree that the shares and the beneficial ownership of or any interest in them and the certificates representing them (including any replacement share or certificates) shall not be sold, assigned, hypothecated, alienated, released from escrow, transferred within escrow or otherwise in any manner dealt with, without express consent, order or direction in writing of the Ontario Securities Commission (hereinafter referred to as the "Commission") being first had and obtained or except as may be required by reason of the death or bankruptcy of any Vendor, in which cases the Trustee shall hold the said certificates, subject to this agreement, for whatever person, firm or corporation shall be legally entitled to be or become the registered owner thereof.

- (3) The Vendors hereby direct the Trustee to retain their respective shares and the certificates (including any replacement shares or certificates) representing the same and not to do or cause anything to be done to release the same from escrow or to allow any transfer, hypothecation or alienation thereof except with and as directed by the written consent, order or direction of the Commission. The Trustee hereby accepts the responsibilities placed on it hereby and agrees to perform the same in accordance with the terms hereof and the written consents, orders or directions of the Commission.
 - (4) If during the period in which any of the said shares are retained in escrow pursuant hereto, any dividend is received by the Trustee in respect of the escrowed shares, any such dividend shall be forthwith paid or transferred to the respective registered owner entitled thereto.
 - (5) All voting rights attached to the escrowed shares shall at all times be exercised by the respective registered owners thereof.
 - (6) The Vendors hereby jointly and severally agree to and do hereby release and indemnify and save harmless the Trustee from and against all claims, suits, demands, costs, damages and expenses which may be occasioned by reason of the Trustee's compliance in good faith with the terms hereof.
 - (7) The Company hereby acknowledges the terms and conditions of this agreement and agrees to take all reasonable steps to facilitate its performance.
 - (8) The written consent, order or direction of the Commission as to a release from escrow of all or part of the said shares, shall terminate this agreement only in respect to those shares so released. For greater certainty this clause does not apply to shares transferred within escrow.
 - (9) (a) In the event that the Company has lost, alienated, or has not obtained a good or marketable title to, or that the Company has abandoned or discontinued development of any or all of the aforesaid property, or that any or all of the said property which was or formed part of the consideration for which the aforesaid shares were issued, has become of little or no value, the Company may and shall declare any such event or circumstance giving particulars thereof to the Commission and the Vendors by way of a resolution of directors and provide a certified copy of the resolution to the Commission and the Vendors.
 - (b) The Vendors jointly and severally agree with the Company and the Trustee that in the event of any such loss, alienation, failure to acquire such title or of such abandonment or discontinuance of development or diminution of value, all of the shares issued or allotted in consideration of such property shall be tendered to the Company by way of gift or for cancellation and shall remain in escrow subject to the terms and conditions of this agreement until the shares are fully and effectually cancelled or otherwise transferred for the benefit of the Company. Where only part of the property is involved, the Commission, after affording the Company and the Vendors an opportunity to be heard, may determine in its sole discretion by order or direction to the Trustee, the number of shares to be tendered to the Company by way of gift or for cancellation and such determinations and declarations shall be final and binding upon each of the parties hereto.
 - (c) Each of the Vendors undertakes and agrees to vote and cause to be voted their respective shares in a manner consistent with the terms, conditions and intent of this agreement in relation to the aforesaid gifting back of shares.
 - (d) Where the shares issued or allotted in consideration of such property cannot be cancelled, they shall be held for the benefit of the Company by the Trustee and remain in escrow subject to the terms and conditions of this agreement, but they shall not be voted and any dividends shall be donated back for the benefit of the Company.
10. If the Trustee should wish to resign, it shall give at least six months notice to the Company, who may, with the written consent of the Commission, by writing appoint another Trustee in its place and such appointment shall be binding on the Vendors and the new Trustee shall assume and be bound by the obligations of the Trustee hereunder.
 11. This agreement may be executed in several parts in the same form and such parts as so executed shall together form one original agreement, and such parts if more than one shall be read together and construed as if all the signing parties hereto had executed one copy of this agreement.

ASPHALT PAVING PLANTS

1. (a) "aggregate material" means any material or materials, including, but not limited to, gravel, slag, limestone, crushed rock, sand, hydrated lime, cement, furnace ash, asbestos, glass or sulphur, or any two or more of them, used to produce asphalt paving when mixed with bituminous asphalt;
- (b) "asphalt paving plant" means equipment designed to dry aggregate material and to mix the aggregate material with bituminous asphalt;
- (c) "fine material" means that portion of aggregate material that will pass through a number 200 sieve as designated in the American Society for Testing Materials publication number ASTM-E-11-61;
- (d) "permanent asphalt paving plant" means an asphalt paving plant that remains at one location for more than one calendar year;
- (e) "portable asphalt paving plant" means an asphalt paving plant that remains at one location for less than one calendar year. O. Reg. 183/72, s. 1.

2. No person responsible for a portable asphalt paving plant shall operate or permit the plant to be operated so as to emit solid material into the air,

- (a) at a rate greater than that derived, by measurement or calculation, from the application of the following formula:

$$E = \frac{A}{B} \times 1.67 \times C$$

Where: E is the amount of solid material emitted in pounds per minute

A is the actual operating rate of production of the plant at the time of testing in tons per hour

B is the maximum designed rate of production of the plant as stated by the manufacturer of the dryer in tons per hour corrected to a moisture content of 5 per cent

C is 1, except that where the material processed contains less than 5 per cent of fine material by weight, C is the actual percentage of fine material contained in the material processed divided by 5 per cent; or

- (b) at a greater rate than 1.67 pounds per minute,

whichever is the lesser. O. Reg. 183/72, s. 2.

3. No person responsible for an asphalt paving plant shall operate or permit the plant to be operated so that visible solid material, a water plume or fallout of water droplets emitted into the air from the asphalt paving plant impinges on any point beyond the limits of the property on which the asphalt paving plant is located. O. Reg. 183/72, s. 3.

4. No person responsible for an asphalt paving plant shall permit visible solid material emitted from any source other than the asphalt paving plant to pass beyond the limits of the property on which the asphalt paving plant is located. O. Reg. 183/72, s. 4.

5. No person responsible for a permanent asphalt paving plant shall operate or permit the plant to be operated so as to emit solid material into the air,

- (a) that will, at any point of impingement, result in a concentration of solid material, measured or calculated, equal to or greater than that derived from the application of the following formula:

$$F = \frac{A}{B} \times 100 \times C$$

Where: F is the calculated average concentration of solid material at a point of impingement in micrograms per cubic metre of air for a thirty-minute period

A is the actual operating rate of production of the plant at the time of testing in tons per hour

B is the maximum designed rate of production of the plant as stated by the manufacturer of the dryer in tons per hour corrected to a moisture content of 5 per cent

C is 1, except that where the material processed contains less than 5 per cent of fine material by weight, C is the actual percentage of fine material contained in the material processed divided by 5 per cent; or

(b) that will result in a concentration of solid material, measured or calculated, at any point of impingement of an average greater than 100 micrograms per cubic metre of air during a period of thirty minutes,

whichever is the lesser. O. Reg. 183/72, s. 5.

6. Regulation 10 of Revised Regulations of Ontario, 1970 is revoked. O. Reg. 183/72, s. 6.

TOTAL GUARANTEED PRODUCTION

4. The total guaranteed production is the guaranteed production per acre determined in accordance with the plan multiplied by the number of acres seeded to corn.

INDEMNITY

5. The maximum indemnity payable for a loss in production of corn is the amount obtained by multiplying the total guaranteed production by the established price prescribed by the plan.

PREMIUM

6. For each crop year in which the insured person seeds acreage to corn, a premium shall be paid, the amount of which shall be determined in the manner prescribed by the plan.

FINAL ACREAGE REPORT

7. In each crop year in which the contract of insurance is in force for corn, the insured person

shall file a final acreage report in the form and manner prescribed by the plan.

CROP YEAR

8. The crop year for corn is the period from the 1st day of March in any year to the 15th day of December next following.

FINAL DATE FOR SEEDING

9. Corn shall be seeded in each crop year not later than the date prescribed by the plan for the area in which the seeded acreage is situate.

HARVESTING OF SEEDED ACREAGE

10.—(1) All acreage seeded to corn shall be harvested as corn silage or grain corn unless the Commission, upon application therefor in writing, consents in writing to,

- (a) the use of the seeded acreage or any part thereof for another purpose;
- (b) the abandonment or destruction of the insured crop or any part thereof; or
- (c) the harvest of any insured acreage prior to the 5th day of September in any crop year.

(2) The harvesting referred to in subparagraph 1 shall be completed not later than the 15th day of December or such other date as may be determined from time to time by the Commission.

(3) Where the harvesting of any seeded acreage is not completed on the date prescribed by subparagraph 2, the insured person shall forthwith notify the Commission in writing and the Commission shall determine,

- (a) the number of unharvested acres and the potential production thereof; and
- (b) whether the harvesting of the seeded acreage was prevented by reason of one or more of the causes of loss insured against.

(4) Where an insured person fails to notify the Commission in accordance with subparagraph 3, no indemnity shall be paid in respect of the unharvested acreage.

(5) Where,

- (a) pursuant to subparagraph 1, any seeded acreage is used for a purpose other than harvesting as grain corn or corn silage; or
- (b) the harvesting of any seeded acreage was prevented by reason of a cause of loss not insured against,

the Commission shall determine the potential production of such acreage and such potential production shall be taken into account in the final adjustment of loss.

11. Where the Commission determines that harvesting of any seeded acreage was prevented by reason of one or more of the causes of loss insured against it shall determine the production of such acreage likely to be recovered by the insured person and such production shall be taken into account in the final adjustment of loss.

VARIETIES OF CORN

12. Except as otherwise determined by the Commission,

- (a) acreage intended for harvesting as grain corn may be seeded only to varieties of corn recommended in Publication No. 296 of the Ministry of Agriculture and Food entitled "Field Crop Recommendations" for the area in which the seeded acreage is situate;
- (b) acreage intended for harvesting as corn silage may be seeded to any licensed variety of corn offered for sale in Ontario.

EVALUATION OF LOSS

13. For the purpose of determining the loss in production of corn in a crop year and the indemnity payable therefor, the value of the crop shall progress through the stages prescribed in paragraphs 14, 15 and 16.

STAGE 1

14.—(1) Stage 1 comprises the period from the date on which the seeding of acreage to corn is completed to and including the 15th day of June in the crop year.

(2) Where loss or damage occurs in Stage 1, the Commission, upon application therefor in writing by the insured person, may consent in writing to,

- (a) the reseeded of the damaged acreage, provided that,
 - (i) for corn silage the variety of corn reseeded is one prescribed by paragraph 12 and that reseeded is completed not later than June 15th, and
 - (ii) for grain corn the variety of corn reseeded is one prescribed by paragraph 12 and that reseeded is completed not later than seven days after the date prescribed by Table 2 as the final date for seeding in the area in which the damaged acreage is situate; or

- (b) the use of the damaged acreage for any other purpose or to the abandonment or destruction of the insured crop on such damaged acreage and, in such case, the Commission shall determine the number of damaged acres and the potential production thereof.

(3) Where the damaged acreage is reseeded to corn in accordance with clause *a* of subparagraph 2, the contract of insurance shall continue to apply to such reseeded acreage.

(4) Where the damaged acreage is used for any other purpose or the insured crop is abandoned or destroyed in accordance with clause *b* of subparagraph 2, the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total seeded acreage shall be calculated by multiplying,

- (a) 30 per cent of the guaranteed production for the damaged acreage; or
- (b) the difference between the guaranteed production and the potential production determined under clause *b* of subparagraph 2 for the damaged acreage,

whichever is the lesser, by the established price per bushel for grain corn and per ton for corn silage.

(5) Where the damaged acreage is not used for any other purpose or the crop thereon is not abandoned or destroyed after the Commission has consented thereto, the amount of loss calculated under subparagraph 4 shall not be taken into account in the final adjustment of loss.

(6) Notwithstanding any application made in writing by the insured person under this paragraph, the Commission may, where loss or damage occurs in Stage 1, notify the insured person in writing that it intends to terminate the insurance coverage on such damaged acreage and to calculate the amount of loss in the manner prescribed in subparagraph 4 with respect to such damaged acreage and, where notice of such intention has been given, the Commission shall calculate accordingly the amount of loss to be taken into account in the final adjustment of loss and the value of the insured crop on such damaged acreage shall not progress beyond Stage 1.

STAGE 2

15.—(1) Stage 2 commences on the 16th day of June in the crop year and, with respect to any part of the seeded acreage, ends with the completion of harvesting of such part.

(2) Where loss or damage occurs in Stage 2, the Commission, upon application therefor in writing by the insured person, may consent in writing to the use of the damaged acreage for any other purpose or to the abandonment or destruction of the insured

crop on such damaged acreage and, in such case, the Commission shall determine the number of damaged acres and the potential production thereof.

(3) Where,

- (a) damaged acreage is used for any other purpose or the insured crop thereon is abandoned or destroyed in accordance with subparagraph 2; or
- (b) the harvesting of any seeded acreage is not completed on the date determined therefor and the harvesting was prevented by reason of a cause of loss not insured against,

the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total seeded acreage shall be calculated by multiplying,

- (i) the guaranteed production for the damaged or unharvested acreage, as the case may be, or
- (ii) the amount by which the guaranteed production exceeds the potential production for the damaged or unharvested acreage,

whichever is the lesser, by the established price.

(4) Where damaged acreage is not used for any other purpose or the crop thereon is not abandoned or destroyed after the Commission has consented thereto, the amount of loss calculated under subparagraph 3 shall not be taken into account in the final adjustment of loss.

(5) Where the harvesting of any seeded acreage is not completed on the date determined therefor and the harvesting was prevented by reason of one or more of the causes of loss insured against, the amount of loss that shall be taken into account in the final adjustment of loss shall be calculated by multiplying the amount by which the guaranteed production for the unharvested acreage exceeds the production likely to be recovered as determined under paragraph 11 by the established price.

(6) Where, at any time after the 15th day of June, two acres or more of the insured acreage is totally destroyed by hail or tornado, the Commission, upon application therefor in writing by the insured person, may consent in writing to the release from the contract of insurance of the acreage so destroyed and, in such case, the amount of loss shall be calculated by multiplying the guaranteed production for the released acreage by the established price.

STAGE 3

16.—(1) Stage 3 applies to seeded acreage with respect to which harvesting has been completed.

(2) Where the actual production of the acreage so harvested is less than the guaranteed production for such acreage, the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total seeded acreage shall be calculated by multiplying the difference between the guaranteed production and the actual production by the established price.

FINAL ADJUSTMENT OF LOSS FOR TOTAL SEEDED ACREAGE

17. The indemnity payable with respect to the total seeded acreage in the final adjustment of loss shall be the sum of all Stage 1, Stage 2 and Stage 3 loss calculations applicable to such acreage, but where,

- (a) the actual production of any harvested acreage; or
- (b) the potential production of any unharvested acreage,

exceeds the guaranteed production of such acreage, the indemnity otherwise payable shall be reduced by the amount obtained by multiplying such excess by the established price.

INCORRECT ACREAGE IN FINAL ACREAGE REPORT

18.—(1) Where the actual seeded acreage of corn in a crop year is less than the seeded acreage declared on the final acreage report, the guaranteed production and the amount of insurance shall be reduced proportionately.

(2) Where the actual seeded acreage of corn in a crop year exceeds the seeded acreage declared on the final acreage report, the total guaranteed production per acre shall remain unchanged.

IN WITNESS WHEREOF The Crop Insurance Commission of Ontario has caused this endorsement to be signed by its general manager but the same shall not be binding upon the Commission until countersigned by a duly authorized representative thereof.

a claim by the insured person is invalid and his right to recover indemnity is forfeited.

WAIVER OR ALTERATION

15. No term or condition of this contract shall be deemed to be waived or altered in whole or in part by the Commission unless the waiver or alteration is clearly expressed in writing signed by the Commission or a representative authorized for that purpose by the Commission.

INTEREST OF OTHER PERSONS

16. Notwithstanding that a person other than the insured person holds an interest of any kind in the insured crop, for the purposes of this contract,

- (a) the interest of the insured person in the insured crop is deemed to be the full value of the crop;
- (b) except as provided in paragraph 17, no indemnity shall be paid to any person other than the insured person.

ASSIGNMENT OF RIGHT TO INDEMNITY

17. The insured person may assign all or part of his right to indemnity under this contract in respect of the insured crop but an assignment is not binding on the Commission and no payment of indemnity shall be made to an assignee unless,

- (a) the assignment is made on a form provided by the Commission; and
- (b) the Commission consents thereto in writing.

NOTICE OF LOSS OR DAMAGE

18.—(1) Where loss or damage to the insured crop results from one or more of the perils insured against and the insured person intends to abandon or destroy the insured crop, or to replant or use the planted acreage for another purpose, the insured person shall notify the Commission in writing of such intention and shall take no further action without the consent in writing of the Commission.

(2) Where loss or damage to the insured crop results from one or more of the perils insured against and the damage was occasioned at a readily ascertainable time, the insured person shall notify the Commission forthwith by telephone and shall confirm in writing within twenty-four hours of such time.

(3) Where loss or damage to the insured crop results from one or more of the perils insured against and it appears, or ought reasonably to appear to the insured person at any time after planting and before the completion of harvesting of the insured crop that the potential production of the insured crop has a value less than the total insured coverage, the insured person shall, as soon as the loss or damage is apparent, notify the Commission in writing forthwith.

(4) Notwithstanding any notice given by the insured person under this paragraph, where on completion of harvesting of the insured crop,

- (a) the total gross value of the insured crop as evidenced by the processor's statement of production is less than the total insured coverage; and
- (b) the loss resulted from one or more of the perils insured against,

the insured person shall notify the Commission in writing forthwith.

NOTICE OF BY-PASSING

19. Where acreage is by-passed by the processor, the insured person shall notify the Commission forthwith by telephone and confirm in writing within twenty-four hours.

ABANDONMENT, DESTRUCTION OR ALTERNATE USE

20.—(1) Acreage planted to the insured crop shall not be put to another use and the insured crop shall not be abandoned or destroyed until the Commission has appraised the potential production of the acreage.

(2) An appraisal made under subparagraph 1 shall not be taken into account in the final adjustment of loss where the insured person harvests the appraised acreage.

ADJUSTMENT OF LOSS

21.—(1) The indemnity payable for loss or damage to the insured crop shall be determined in the manner prescribed by this contract.

(2) The Commission may cause the production of the insured crop to be appraised by any method that it deems proper.

(3) No indemnity shall be paid for a loss in respect of the insured crop unless the insured person establishes,

- (a) the total gross income obtained from the insured crop for the crop year; and
- (b) that the loss in income or part thereof resulted directly from one or more of the perils insured against.

(4) Where a loss resulted partly from a peril insured against and partly from a cause of loss not insured against, the Commission shall determine the amount of the loss that resulted from the cause of loss not insured against, and the indemnity payable by the Commission under this contract shall be reduced accordingly.

PROOF OF LOSS

22.—(1) A claim for indemnity in respect of the insured crop shall be made on a proof of loss form provided by the Commission and shall be filed with the Commission not later than sixty days after,

- (a) the completion of harvesting of the insured crop; or
- (b) the end of the crop year,

whichever is the earlier.

(2) Subject to subparagraph 3, a claim for indemnity shall be made by the insured person.

- (3) A claim for indemnity may be made,
 - (a) in the case of the absence or inability of the insured person, by his agent; or
 - (b) in the case of the absence or inability of the insured person or on his failure or refusal to do so, by an assignee under an assignment made in accordance with paragraph 17.

(4) Where required by the Commission, the information given in a proof of loss shall be verified by statutory declaration.

ARBITRATION

23. Where the Commission and the insured person fail to resolve any dispute respecting the adjustment

of a loss under this contract, the matter shall be determined by arbitration in accordance with the regulations.

TIME FOR PAYMENT OF INDEMNITY

24.—(1) No indemnity under this contract becomes due and payable until,

- (a) the end of the crop year; and
- (b) the premium has been paid in full.

(2) Where the indemnity payable by the Commission under this contract is established by the filing of a proof of loss form or by an award of an arbitrator or board of arbitration, it shall be paid within sixty days of the receipt by the Commission of the proof of loss form or award, as the case may be.

(3) Nothing in this paragraph prevents the Commission from paying indemnity under this contract at an earlier date.

SUBROGATION

25. Where the Commission has paid a claim under this contract, the Commission is subrogated to the extent thereof to all rights of recovery of the insured person against any person and may bring action in name of the insured person to enforce those rights.

RIGHT OF ENTRY

26. The Commission has a right of entry to the premises of the insured person that may be exercised by agents of the Commission at any reasonable time or times for any purpose related to the contract of insurance.

NOTICE

27.—(1) Any written notice to the Commission shall be given by delivery thereof or by sending it by mail to the Commission.

(2) This endorsement does not insure against a loss in the production of onions in a crop year resulting from insect infestation or plant disease unless the insured person establishes that he followed a recommended control program during the crop year.

DURATION OF INSURANCE

2. The contract of insurance for onions is in force for the crop year in which it is made and continues in force for each crop year thereafter until it is cancelled or terminated in accordance with the regulations.

COVERAGE

3. The coverage provided for onions in each crop year shall be determined in accordance with the plan.

TOTAL GUARANTEED PRODUCTION

4. The total guaranteed production is the guaranteed production per acre determined in accordance with the plan multiplied by the number of acres seeded to onions.

INDEMNITY

5.—(1) The maximum indemnity payable for a loss in production of onions is the amount obtained by multiplying the total guaranteed production by the established price prescribed by the plan.

(2) For the first year in which a contract of insurance is in effect, with respect to any Stage, no indemnity is payable in respect of the first 5 per cent of the insured acreage.

(3) For subsequent years in which a contract of insurance is in effect with the insured person,

(a) the deductible acreage shall increase by 5 per cent for each claim year to a maximum of 20 per cent; and

(b) the deductible acreage shall decrease by 5 per cent for each no claim year immediately following two consecutive no claim years to a minimum of 5 per cent.

(4) Notwithstanding subparagraphs 2 and 3, the deductible acreage in respect of a claim shall not be less than the minimum percentage of deductible acreage under subparagraphs 2 and 3 applied to the total acreage.

PREMIUM

6. For each crop year in which the insured person seeds acreage to onions, a premium shall be paid, the amount of which shall be determined in the manner prescribed by the plan.

FINAL ACREAGE REPORT

7. In each crop year in which the contract of insurance is in force for onions, the insured person shall file a final acreage report in the form and manner prescribed by the plan.

CROP YEAR

FINAL DATE FOR PLANTING

9. The final date in the crop year for planting the insured crop is the 25th day of May or such other date as may be determined from time to time by the Commission.

HARVESTING OF PLANTED ACREAGE

10.—(1) All acreage planted to onions in a crop year shall be harvested unless the Commission, upon application therefor in writing, consents in writing to,

(a) the use of the planted acreage or any part thereof for another purpose; or

(b) the abandonment or destruction of the insured crop or any part thereof.

(2) The harvesting referred to in subparagraph 1 shall be completed not later than the 31st day of October or such other date as may be determined from time to time by the Commission.

EVALUATION OF LOSS

11. For the purposes of determining the loss in production of onions in a crop year and the indemnity payable therefor, the value of the crop shall progress through the stages prescribed in paragraphs 12, 13, 14 and 15.

STAGE 1

12.—(1) Stage 1 comprises the period from the date on which the planting of acreage to onions is completed to and including the 1st day of July in the crop year.

(2) When loss or damage occurs in Stage 1, the Commission, upon application therefor in writing by the insured person, may consent in writing to,

- (a) the replanting of the damaged acreage, provided that the replanting is completed not later than the 25th day of May; or
- (b) the use of the damaged acreage for any other purpose or to the abandonment or destruction of the insured crop on such damaged acreage.

(3) Where the damaged acreage is replanted to onions in accordance with clause *a* of subparagraph 2, the Commission shall pay an indemnity,

- (a) for onions grown from seed of \$100 for each acre replanted; and
- (b) for onions grown from sets of \$200 for each acre replanted,

and the contract of insurance shall continue to apply to such replanted acreage.

(4) Where the damaged acreage is used for any other purpose or the insured crop is abandoned or destroyed in accordance with clause *b* of subparagraph 2, the Commission shall pay an indemnity,

- (a) for onions grown from seed of \$100 per acre; and
- (b) for onions grown from sets of \$200 per acre,

and the contract of insurance shall terminate with respect to such acreage.

(5) Notwithstanding any application made in writing by the insured person under this paragraph, the Commission may, where loss or damage occurs in Stage 1, notify the insured person in writing that it intends to terminate the insurance coverage on such damaged acreage, and in such case, no further indemnity shall be payable in respect of the damaged acreage.

STAGE 2

13.—(1) Stage 2 commences on the 2nd day of July in the crop year and, with respect to any part of the planted acreage, ends,

- (a) for onions grown from seed on the 1st day of September; and
- (b) for onions grown from sets on completion of harvesting.

(2) Where loss or damage occurs in Stage 2, the Commission upon application therefor in writing by the insured person, may consent in writing to the use of the damaged acreage for any other purpose or to the abandonment or destruction of the insured crop on such damaged acreage and, in such case, the Commission shall,

- (a) for onions grown from seed, pay an indemnity of \$200 for each acre damaged and subsequently destroyed; or
- (b) for onions grown from sets, determine the number of damaged acres and the potential production thereof.

(3) Where, in the case of onions grown from sets,

- (a) damaged acreage is used for any other purpose or the insured crop thereon is abandoned or destroyed in accordance with subparagraph 2; or
- (b) the harvesting of any planted acreage is not completed on the date determined therefor,

the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total planted acreage shall be calculated by multiplying the amount by which the guaranteed production for the damaged acreage exceeds the potential production determined therefor by the established price per bag.

(4) Where damaged acreage is not used for any other purpose or the crop thereon is not abandoned or destroyed after the Commission has consented thereto, the amount of loss calculated under subparagraph 3 shall not be taken into account in the final adjustment of loss.

STAGE 3

14.—(1) Stage 3,

- (a) for onions grown from seed, commences on the 2nd day of September in the crop year and, with respect to any part of the planted acreage, ends with the completion of harvesting of such part; and

(b) for onions grown from sets, applies to planted acreage with respect to which harvesting has been completed.

(2) Where, in the case of onions grown from seed, loss or damage occurs in Stage 3, the Commission, upon application therefor in writing by the insured person, may consent in writing to the use of the damaged acreage for any other purpose or to the abandonment or destruction of the insured crop on such damaged acreage and, in such case, the Commission shall determine the number of damaged acres and the potential production thereof.

(3) Where,

(a) damaged acreage is used for any other purpose or the insured crop thereon is abandoned or destroyed in accordance with subparagraph 2; or

(b) the harvesting of any planted acreage is not completed on the date determined therefor,

the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total planted acreage shall be calculated by multiplying the amount by which the guaranteed production for the damaged or unharvested acreage, as the case may be, exceeds the potential production determined therefor by the price per bag.

(4) Where damaged acreage is not used for any other purpose or the crop thereon is not abandoned or destroyed after the Commission has consented thereto, the amount of loss calculated under subparagraph 3 shall not be taken into account in the final adjustment of loss.

(5) Where, in the case of onions grown from sets, the actual production of the harvested acreage is less than the guaranteed production for such acreage, the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total planted acreage shall be calculated by multiplying the difference between the guaranteed production and the actual production by the established price per bag.

STAGE 4

15.—(1) Stage 4 applies to acreage planted to onions grown from seed with respect to which harvesting has been completed.

(2) Where the actual production of the acreage so harvested is less than the guaranteed production for such acreage, the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total planted acreage shall be calculated by multiplying the difference between the guaranteed production and the actual production by the established price per bag.

FINAL ADJUSTMENT OF LOSS FOR TOTAL PLANTED ACREAGE

16.—(1) The indemnity payable with respect to the total planted acreage in the final adjustment of loss shall be the sum of all Stage 1, Stage 2, Stage 3 and Stage 4 loss calculations applicable to such acreage, but subject to subparagraph 2, where,

(a) the actual production of any harvested acreage; or

(b) the potential production of any unharvested acreage,

exceeds the guaranteed production of such acreage, the indemnity otherwise payable shall be reduced by the amount obtained by multiplying such excess by the established price per bag.

(2) Notwithstanding subparagraph 1, no indemnities paid in Stage 1 with respect to onions grown from sets or paid in Stage 1 or Stage 2 with respect to onions grown from seed shall be subject to reduction under this paragraph.

(3) No more than one indemnity payment with respect to the same planted acreage shall be paid in any one of the Stages and in no case shall indemnity be paid for acreage in excess of the total insured acreage.

DAMAGE AFTER HARVEST

17. No indemnity shall be paid in respect of any loss or damage suffered by the insured crop after combining and in no case shall any indemnity be paid with respect to onions in storage.

INCORRECT ACREAGE IN FINAL ACREAGE REPORT

18.—(1) Where the actual planted acreage of onions in a crop year is less than the planted acreage declared on the final acreage report, the total guaranteed production and the amount of insurance shall shall be reduced proportionately.

(2) Where the actual planted acreage of onions in a crop year exceeds the planted acreage declared on the final acreage report, the guaranteed production shall be reduced proportionately.

IN WITNESS WHEREOF The Crop Insurance Commission of Ontario has caused this endorsement to be signed by its general manager but the same shall not be binding upon the Commission until countersigned by a duly authorized representative thereof.

4. The total guaranteed production is the guaranteed production per acre determined in accordance with the plan multiplied by the number of acres planted to potatoes.

INDEMNITY

5. The maximum indemnity payable for a loss in production of potatoes in a crop year is the amount obtained by multiplying the total guaranteed production by such established price per hundredweight as is determined in accordance with the plan.

PREMIUM

6. For each crop year in which the insured person plants acreage to potatoes, an annual premium shall be paid, the amount of which shall be determined in the manner prescribed by the plan.

FINAL ACREAGE REPORT

FINAL DATE FOR PLANTING

9. The final date for planting potatoes in a crop year shall be determined in accordance with the plan.

INDEMNITY

10.—(1) The maximum indemnity payable for a loss in production of potatoes is the amount obtained by multiplying the total guaranteed production by the established price prescribed by the plan.

(2) For the first year in which a contract of insurance is in effect, with respect to any Stage, no indemnity is payable in respect of the first 5 per cent of the insured acreage.

(3) For subsequent years in which a contract of insurance is in effect with the insured person,

- (a) the deductible acreage shall increase by 5 per cent for each claim year to a maximum of 20 per cent; and
- (b) the deductible acreage shall decrease by 5 per cent for each no claim year immediately following two consecutive no claim years to a minimum of 5 per cent.

(4) Notwithstanding subparagraphs 2 and 3, the deductible acreage in respect of a claim shall not be less than the minimum percentage of deductible acreage under subparagraphs 2 and 3 applied to the total acreage.

HARVESTING OF PLANTED ACREAGE

11.—(1) All acreage planted to potatoes in a crop year shall be harvested unless the Commission, upon application therefor in writing, consents in writing to,

- (a) the use of the planted acreage or any part thereof for another purpose;
- (b) the abandonment or destruction of the insured crop or any part thereof; or
- (c) the digging of the insured crop or any part thereof before the earliest date for harvesting prescribed by subparagraph 2.

(2) The harvesting referred to in subparagraph 1 shall be commenced not earlier than,

- (a) for early potatoes, the 1st day of July; and

(4) Where an insured person fails to notify the Commission in accordance with subparagraph 3, no indemnity shall be paid in respect of the unharvested acreage.

(5) Where, with the consent of the Commission under clause *c* of subparagraph 1, any planted

acreage is dug before the earliest date for harvesting prescribed by subparagraph 2, the Commission shall determine the potential production of such acreage and such potential production,

- (a) shall be deemed to be not less than the area average yield for such acreage; and
- (b) shall be taken into account in the final adjustment of loss.

EVALUATION OF LOSS

12. For the purposes of determining the loss in production of potatoes in a crop year and the indemnity payable therefor, the value of the crop shall progress through the stages prescribed in paragraphs 13, 14, 15 and 16.

STAGE 1

13.—(1) Stage 1 comprises the period from the date on which the planting of acreage to potatoes is completed to and including,

- (a) for early potatoes, the 30th day of April; and
- (b) for late potatoes, the 15th day of June.

(2) Where loss or damage occurs in Stage 1, the Commission, upon application therefor in writing by the insured person, may consent in writing to,

- (a) the replanting of the damaged acreage, provided that the replanting is completed not later than,
 - (i) for early potatoes, the 30th day of April, and
 - (ii) for late potatoes, the 15th day of June; or
- (b) the use of the damaged acreage for any other purpose or to the abandonment or destruction of the insured crop on such damaged acreage.

(3) Where the damaged acreage is replanted to potatoes in accordance with clause *a* of subparagraph 2, the Commission shall pay an indemnity of \$60 for each acre replanted and the contract of insurance shall continue to apply to such replanted acreage.

(4) Where the damaged acreage is used for any other purpose or the insured crop is abandoned or destroyed in accordance with clause *b* of subparagraph 2, the Commission shall pay an indemnity of \$60 per acre and the contract of insurance shall terminate with respect to such acreage.

(5) Notwithstanding any application made in writing by the insured person under this paragraph, the

Commission may, where loss or damage occurs in Stage 1, notify the insured person in writing that it intends to terminate the insurance coverage on such damaged acreage, and in such case, no further indemnity shall be payable in respect of the damaged acreage.

STAGE 2

14.—(1) Stage 2 commences,

(a) for early potatoes, on the 1st day of May; and

(b) for late potatoes, on the 16th day of June,

and for any part of the planted acreage ends,

(c) for early potatoes, on the 1st day of July; and

(d) for late potatoes,

(i) in the counties of Essex and Kent, the 15th day of August, and

(ii) in any other county or in a regional municipality or territorial district, the 1st day of September.

(2) Where loss or damage occurs in Stage 2, the Commission upon application therefor in writing by the insured person, may consent in writing to the use of the damaged acreage for any other purpose or to the abandonment or destruction of the insured crop on such damaged acreage and, in such case, the Commission shall pay an indemnity of \$120 per acre and the contract of insurance shall terminate with respect to such acreage.

(3) Where the damaged acreage is not used for any other purpose or the crop thereon is not abandoned or destroyed after the Commission has consented thereto, the amount of loss calculated under subparagraph 2 shall not be taken into account in the final adjustment of loss.

STAGE 3

15.—(1) Stage 3 commences,

(a) for early potatoes, on the 2nd day of July; and

(b) for late potatoes,

(i) in the counties of Essex and Kent, on the 16th day of August, and

(ii) in any other county or in a regional municipality or territorial district, on the 2nd day of September,

and for any part of the planted acreage ends with completion of harvesting of such part.

(2) Where loss or damage occurs in Stage 3, the Commission, upon application therefor in writing by the insured person, may consent in writing to the use of the damaged acreage for any other purpose or to the abandonment or destruction of the insured crop on such damaged acreage and, in such case, the Commission shall determine the number of damaged acres and the potential production thereof.

(3) Where,

(a) damaged acreage is used for any other purpose or the insured crop thereon is abandoned or destroyed in accordance with subparagraph 2; or

(b) the harvesting of any planted acreage is not completed on the date determined therefor,

the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total planted acreage shall be calculated by multiplying the amount by which the guaranteed production for the damaged or unharvested acreage, as the case may be, exceeds the potential production determined therefor by the price per hundredweight.

(4) Where damaged acreage is not used for any other purpose or the crop thereon is not abandoned or destroyed after the Commission has consented thereto, the amount of loss calculated under subparagraph 3 shall not be taken into account in the final adjustment of loss.

STAGE 4

16.—(1) Stage 4 applies to acreage with respect to which harvesting has been completed.

(2) Where the actual production of the acreage so harvested is less than the guaranteed production for such acreage, the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total planted acreage shall be calculated by multiplying the difference between the guaranteed production and the actual production by the established price per hundredweight.

FINAL ADJUSTMENT OF LOSS FOR TOTAL PLANTED ACREAGE

17.—(1) The indemnity payable with respect to the total planted acreage in the final adjustment of loss shall be the sum of all Stage 1, Stage 2, Stage 3 and Stage 4 loss calculations applicable to such acreage, but, subject to subparagraph 2, where,

(a) the actual production of any harvested acreage; or

(b) the potential production of,

(i) any unharvested acreage, and

(ii) any acreage dug before the earliest date for harvesting prescribed by subparagraph 2 of paragraph 11,

exceeds the guaranteed production of such acreage, the indemnity otherwise payable shall be reduced by the amount obtained by multiplying such excess by the established price per hundredweight.

(2) Notwithstanding subparagraph 1, no indemnities paid in Stage 1 or Stage 2 shall be subject to reduction under this paragraph.

(3) No more than one indemnity payment with respect to the same planted acreage shall be paid in any one of the Stages and in no case shall indemnity be paid for acreage in excess of the total insured acreage.

DAMAGE AFTER HARVEST

18. No indemnity shall be paid in respect of any loss or damage suffered by the insured crop after harvest and in no case shall any indemnity be paid with respect to potatoes in storage.

INCORRECT ACREAGE IN FINAL ACREAGE REPORT

19.—(1) Where the actual planted acreage of potatoes in a crop year is less than the planted acreage declared on the final acreage report, the total guaranteed production and the amount of insurance shall be reduced proportionately.

{2) Where the actual planted acreage of potatoes in a crop year exceeds the planted acreage declared on the final acreage report, the guaranteed production shall be reduced proportionately.

(8) The costs for which the Plan may be liable to bear a portion under subsection 6 are the costs of bringing the action to the conclusion of the trial only and do not include the costs of any other proceeding without the written consent of the General Manager.

(10) The insured person, at any time prior to the trial of an action commenced under clause a of subsection 9, may, subject to the rules of court, join in such action any additional claims arising out of the same occurrence and thereafter the insured person shall have the conduct of the action as if he had commenced it under section 36 of the Act.

(11) Where the insured person is an infant or under other disability or has died, the General Manager may commence an action in the name of the Plan for the recovery of the cost of insured services rendered to him and, in that event, shall forthwith give notice of the institution of such action to the parent or guardian of the infant, or to the committee or guardian of the person under disability, or to the personal representative, if any, of the deceased person, and subsections 9 and 10 apply *mutatis mutandis* to such action. Filed—July 24th, 1972.

REGULATION MADE UNDER THE PHARMACY ACT

PARCOST C.D.I.

1. For the purposes of the Act, the Parcost C.D.I. is the comparative drug index contained in the Schedule hereto. O. Reg. 361/72, s. 1.

Schedule

PART I

INTRODUCTION

1. The Parcost Comparative Drug Index has been compiled by the Ministry of Health and its advisory committee, "The Drug Quality and Therapeutics Committee".

2. The Index is a compilation of pharmaceutical preparations, arranged in comparative categories and groupings according to the nature, strength and dosage form of the active therapeutic constituent.

3. The products listed in the Index meet recognized standards of quality required by the Drug Quality and Therapeutics Committee.

4. Except where indicated otherwise by the words "not interchangeable" the Drug Quality and Therapeutics Committee considers those products listed in the same bar chart to be interchangeable pharmaceutical products.

5. The cost listed in the Index is derived from a price submitted by the pharmaceutical manufacturer or supplier and is based on the package size listed for the product in the C.D.I., and represents the maximum price the pharmacist or hospital should pay for the product.

6. Manufacturers distributing primarily direct to the pharmacy are indicated by a symbol (D) after the firm name in the MANUFACTURERS' PRODUCT LISTS SECTION.

7. The cost of prescribed pharmaceutical preparations to the patient is composed of two major components:

- (i) Product cost to the pharmacist.
- (ii) Pharmacist's professional fee.

For the purposes of section 52 of this Act, the product cost-plus professional fee method of pricing a prescription shall be used and the prescription fee so used shall not exceed a maximum of \$2.20.

THE PHARMACY ACT

O. Reg. 544/72.

Parcost C.D.I.

Filed—November 15th, 1972.

REGULATION MADE UNDER THE PHARMACY ACT

PARCOST C.D.I.

1. For the purposes of the Act, the Parcost C.D.I. is the comparative drug index contained in the Schedule hereto. O. Reg. 544/72, s. 1.

Schedule

PART I

INTRODUCTION

1. The Parcost Comparative Drug Index has been compiled by the Ministry of Health and its advisory committee, "The Drug Quality and Therapeutics Committee".

2. The Index is a compilation of pharmaceutical preparations, arranged in comparative categories and groupings according to the nature, strength and dosage form of the active therapeutic constituent.

3. The products listed in the Index meet recognized standards of quality required by the Drug Quality and Therapeutics Committee.

4. Except where indicated otherwise by the words "not interchangeable", for the purposes of subsection 1 of section 52 of the Act, products listed in the same bar chart of the Parcost C.D.I. are interchangeable.

5. The cost listed in the Index is derived from a price submitted by the pharmaceutical manufacturer or supplier and is based on the package size listed for the product in the C.D.I., and represents the maximum price the pharmacist or hospital should pay for the product.

6. Manufacturers distributing primarily direct to the pharmacy are indicated by a symbol (D) after the firm name in the MANUFACTURERS' PRODUCT LISTS SECTION.

7. The cost of prescribed pharmaceutical preparations to the patient is composed of two major components:

- i. Product cost to the pharmacist.
- ii. Pharmacist's professional fee.

For the purposes of section 52 of this Act, the product cost-plus professional fee method of pricing a prescription shall be used and the prescription fee so used shall not exceed a maximum of \$2.20.

Oral Contraceptives — Grouped According to Estrogenic Content

The products listed together in any given category are considered to be comparably effective when used as ovulatory suppressants. However, it is recognized that there may be a variation in adverse effects among these products as well as a variation in their application when they are used for purposes other than contraception. For this reason, selection of the appropriate agent must be based on professional judgement to meet the individual requirements of the patient.

10. The crop year for grapes is the period from the 1st day of December in any year to the 30th day of November next following.

(2) For the purpose of subparagraph 1, actual production shall include,

(a) the total vineyard run of all insured acreage; and

(b) the potential production of wholly or partially unharvested acreage where the failure to harvest resulted from a cause of loss not insured against.

17. The insured person may assign all or part of his right to indemnity under this contract in respect of the insured crop but an assignment is not binding on the Commission and no payment of indemnity shall be made to an assignee unless,

- (a) the assignment is made on a form provided by the Commission; and
- (b) the Commission consents thereto in writing.

18.—(1) The indemnity payable for loss or damage to the insured crop shall be determined in the manner prescribed by this contract.

(2) The Commission may cause the production of the insured crop to be appraised by any method that it deems proper.

(3) No indemnity shall be paid for a loss in respect of the insured crop unless the insured person establishes,

- (a) the actual production obtained from the insured crop for the crop year; and
- (b) that the loss in production or part thereof resulted directly from one or more of the perils insured against.

(4) Where a loss in production resulted partly from a peril insured against and partly from a

cause of loss not insured against, the Commission shall determine the amount of the loss that resulted from the cause of loss not insured against, and the indemnity payable by the Commission under the contract shall be reduced accordingly.

PROOF OF LOSS

19.—(1) A claim for indemnity in respect of the insured crop shall be made on a proof of loss form provided by the Commission and shall be filed with the Commission not later than sixty days after,

- (a) the completion of harvesting of the insured crop; or
- (b) the end of the crop year,

whichever is the earlier.

(2) Subject to subparagraph 3, a claim for indemnity shall be made by the insured person.

(4) Where required by the Commission, the information given in a proof of loss form shall be verified by statutory declaration.

ARBITRATION

20. Where the Commission and the insured person fail to resolve any dispute respecting the adjustment of a loss under this contract, the matter shall be determined by arbitration in accordance with the regulations.

TIME FOR PAYMENT OF INDEMNITY

21.—(1) No indemnity under this contract becomes due and payable until,

- (a) the end of the crop year; and
- (b) the premium has been paid in full.

(2) Where the indemnity payable by the Commission under this contract is established by the filing of a proof of loss form or by an award of an arbitrator or board of arbitration, it shall be paid within sixty days of the receipt by the Commission of the proof of loss form or award, as the case may be.

(3) Nothing in this paragraph prevents the Commission from paying indemnity under this contract at an earlier date.

SUBROGATION

22. Where the Commission has paid a claim under this contract, the Commission is subrogated to the extent thereof to all rights of recovery of the insured person against any person and may bring action in the name of the insured person to enforce those rights.

RIGHT OF ENTRY

23. The Commission has a right of entry to the premises of the insured person that may be exercised by agents of the Commission at any reasonable time or times for any purpose related to the contract of insurance.
